I support the XM radio system as a subscriber to their services. I do not want to see the HR4026 bill to limit XM radio services of traffic and weather passing in ANY form. In rural areas such as Montana, we depend on these reports to plan our work, to safely travel and we want to continue to do so. There are many areas where there is no or limited service from local radio stations and limited if any cell phone service as well. We depend on the XM service for that information and also for entertainment. I am a rancher and do some trucking and also traveling where my XM is the only entertainment and information available. I want to continue to enjoy what I paid for as a subscriber. My family has two radios one in my son's semi truck and the other is in the house or taken with me on my trips. We are very big users of the XM system. Stop HR4026 and leave XM alone. Thank You. Jack Ryan, Rancher and Trucker in Montana
